**Effortless Care, Inseparable Intimacy
Where Love Meets Convenience.**

Stock code [300315]

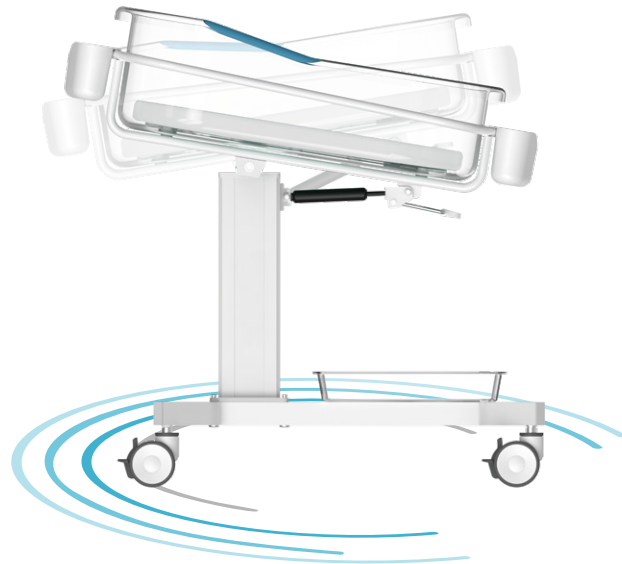

Humanized Design for Easier Caregiving

In every moment of newborn care, safety and tenderness go hand in hand.

■ Basin two-way tilt function

The infant basin features two-way tilting functionality with stepless adjustment within $\pm 13^\circ$, effectively helping reduce infant regurgitation.

A robust and secure structural design prevents lateral tipping even when tilted to maximum angles.

Bidirectional bassinet tilt function

■ Skin-friendly Mattress, Nurturing Quality Sleep for Your Baby

The pressure-relieving anti-decubitus mattress is made of TPU material—soft, waterproof, and gentle on newborns' delicate skin.

An optional thicker EPU mattress is available with upgraded material, providing continuous, stable support for your baby while enhancing comfort.

Optional Thicker EPU mattress

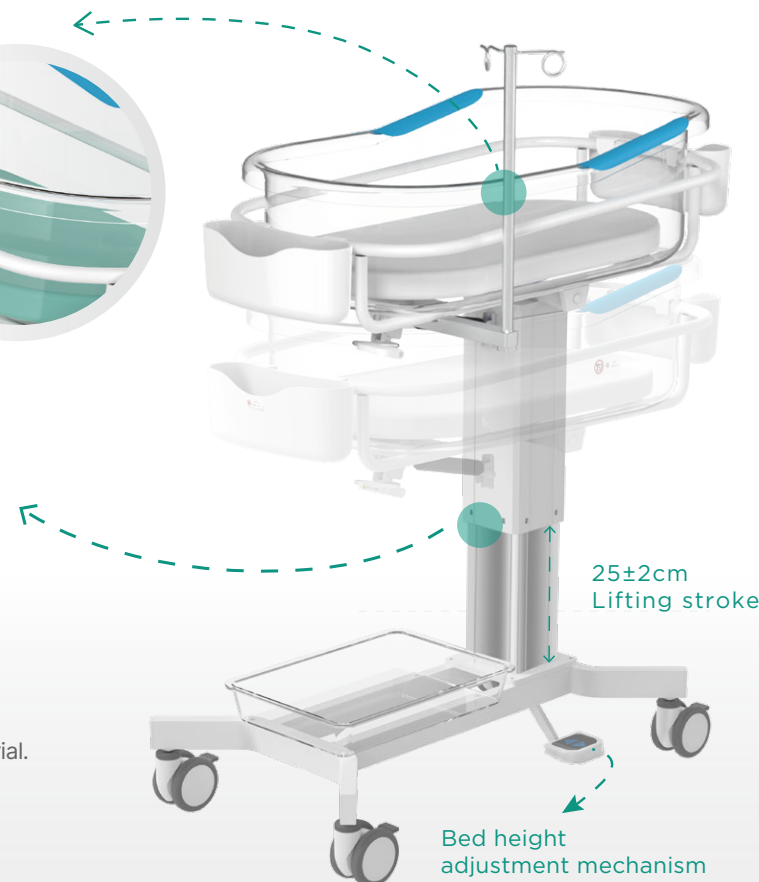

■ Freely Adjustable Bed Height Optional

An ultra-high lifting stroke (25 ± 2 cm) allows the bed to be locked at an optimal height, fully meeting the needs of both parent-child interaction and medical staff caregiving at varying heights.

■ Transparent View, Complete Monitoring of Baby's Movement

The infant basin is made from transparent, eco-friendly ABS material.

The bottom features drainage channels and ventilation holes, constantly maintaining a dry, breathable, and comfortable environment within the basin.

Bedside Care, bringing mother's love within arm's reach

■ Family-centered care optimizes the caregiving process, encourages parental involvement, and supports early bonding.

It helps increase exclusive breastfeeding rates, lowers postpartum complication risks, and promotes faster maternal recovery and infant health.

■ Compatible with jaundice treatment devices, offering 24-hour bedside care and phototherapy support for both infants and parents.

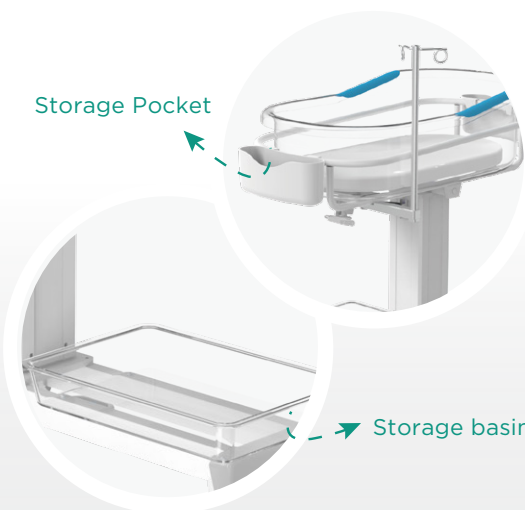

■ Large Storage Capacity

Includes two storage pouches at the front and back of the bed frame, and a large-capacity storage basin underneath—ideal for keeping baby care essentials close at hand.

■ Constructed from cold-rolled steel, the bed frame is durable, stable, and resistant to deformation.

■ Large silent casters, each independently lockable, ensure smooth mobility and secure positioning.
