

Key Features

- Wireless connections
- Ambu's unique hygienic system
- The rigidity of the chest is adjustable
- Jaw thrust possible
- Flexible defib electrodes
- PC-compatible
- ECG Box is part of the software

Ambu® Defib Trainer W

The Ambu Defib Trainer W (Wireless) is an advanced instruction- and training manikin that has been designed for training early defibrillation with AEDs, semi-automatic and manual defibrillators.

Connection free

The Ambu Defib Trainer W does not need cables or wires. Which means it can be placed away from computers and power supplies. This gives a great amount of freedom during training, and because there are no wires or cables lying around it gives an even more realistic scenario. It is however possible to connect the manikin to USB.

Modular Expandable

The Ambu Defib Trainer W is modular expandable, meaning that you can invest gradually and update the system as you go along.

Mechanical Instrument

Ambu Defib Trainer W has the well-known mechanical monitor instrument (easy change of scale plates on the mechanical monitor instrument).

Carotid Pulse

Carotid pulse is electronic on the Defib Trainer W.

Defibrillation and ECG

Realistic defibrillation up to 400 joule can be taught and practiced.

The Defib Trainer W offers comes with 3-4 lead ECG.

The CPR Software is part of the wireless system in the Defib Trainer. The CPR Software analyses and displays the performance done on the manikin in real time. In addition the CPR Software can display and control the ECG. The virtual ECG provides 26 rhythms and 2 artefacts and can automatically detect defibrillation.

TRAINING

ACCESSORIES

5 Face pieces	234 000 703
100 Head bags	234 000 702
Arms complete	234 000 704
Arms, legs, jogging suit trousers and bag	234 000 706
Jogging suit jacket	234 000 790
Jogging suit trousers	234 000 792
Legs with trousers	234 000 786
Carrying bag	234 000 794

MATERIALS

Basic unit	Polyethylene
Instrument part	ABS plastic
Skull	PVC, hard
Chest, face	PVC, soft
