Ambu®

Electrosurgery products

Since 1937, breakthrough ideas have fuelled our work on bringing efficient healthcare solutions to life. This is what we create within our fields of excellence – Anaesthesia, Patient Monitoring & Diagnostics and Emergency Care.

Millions of patients and healthcare professionals worldwide depend on the functionality and performance of our products. We are dedicated to improving patient safety and determined to advance single-use devices.

We are very proud of our innovations, from the first Ambu bag to the trusted Ambu BlueSensor® electrodes and our newest landmark solutions like the Ambu aScope™ – the world's first single-patient use flexible videoscope. Our commitment to bring new ideas and superior service to our customers has made Ambu one of the most reputable medical companies in the world.

All of our electrosurgery products are single use to prevent cross infection.

Electrode Accessories

Our electrosurgery tips have a hex lock fitting for a secure fit and accurate use. All are sterile and individually packed.

Electrosurgery Pencils

Ambu's electrosurgery pencils are ergonomically designed with separate buttons for cutting and coagulation, which are well defined and responsive for optimum surgeon comfort.

Compared to re-usable electrosurgery pencils, Ambu's single use electrosurgery pencils are the more cost effective option.

Our pencils come with an optional tip cleaner and/or holster and have a hexlock fitting ensuring a secure fit with our matching accessory range.

Associated Products - Cables

Ambu have a cable to use with all major electrosurgery machines.

Electrosurgery Grounding Plates

Ambu Neutralect electrosurgery grounding plates have soft, flexible polyethylene foam backing which is non-permeable and provides protection for staff against electrical shocks. The skin friendly, soft conductive adhesive, is designed to fill all skin cavities, ensuring low heat build-up on skin.

Ambu Neutralect electrosurgery grounding plates are universal for use with adults and paediatric patients and come supplied with or without pre-attached lead wire.
