

Greater Protection Increased Safety Improved Performance

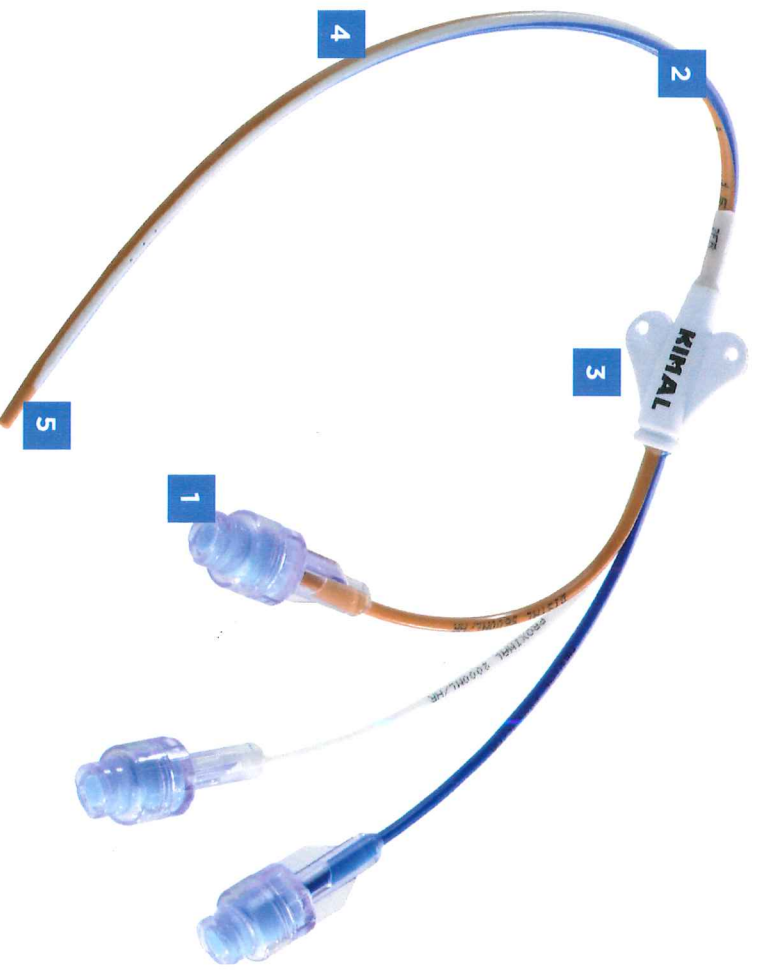

The Altius™ range of central venous catheters utilises **Multi-Tube™** Technology to produce a catheter with round lumens, resulting in 40% more flow without increasing the size of the catheter.

Flexibility is achieved as a wider range of treatments can be delivered through one catheter without compromising on flow.

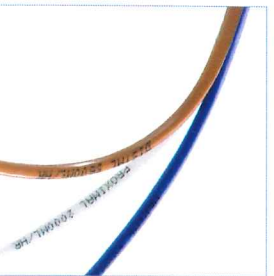

More lumens and improved flow reduce the need to insert additional lines, resulting in minimised risk of catheter related bloodstream infection.

ALTIUS™ ADULT CVCS DELIVER CLINICIANS THE FOLLOWING:

1. Luer**Safe™** connectors
2. Full colour coded lumens
3. Integrated suture wing
4. Full range of lumens and lengths
5. Soft tip

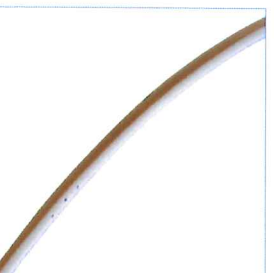

1. Luer**Safe™** connectors help protect a patient's catheter against contamination which can lead to bloodstream infections and accidental air embolism.

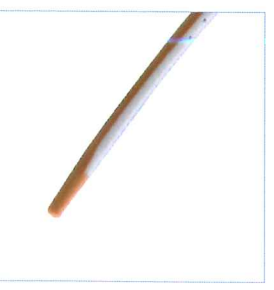

2. Colour coded lumens reduce the risk of misconnections and ensure photosensitive drugs can safely be administered.

3. **Multi-Tube™** Technology manufacture means no hub connection resulting in laminar flow and smooth guidewire passage. Altius™ features an integrated suture wing instead of a hub.

4. Altius™ Adult CVCs available in a variety of lengths and sizes.

5. Altius™ features a soft tip to protect the intima of the cannulated vessel.

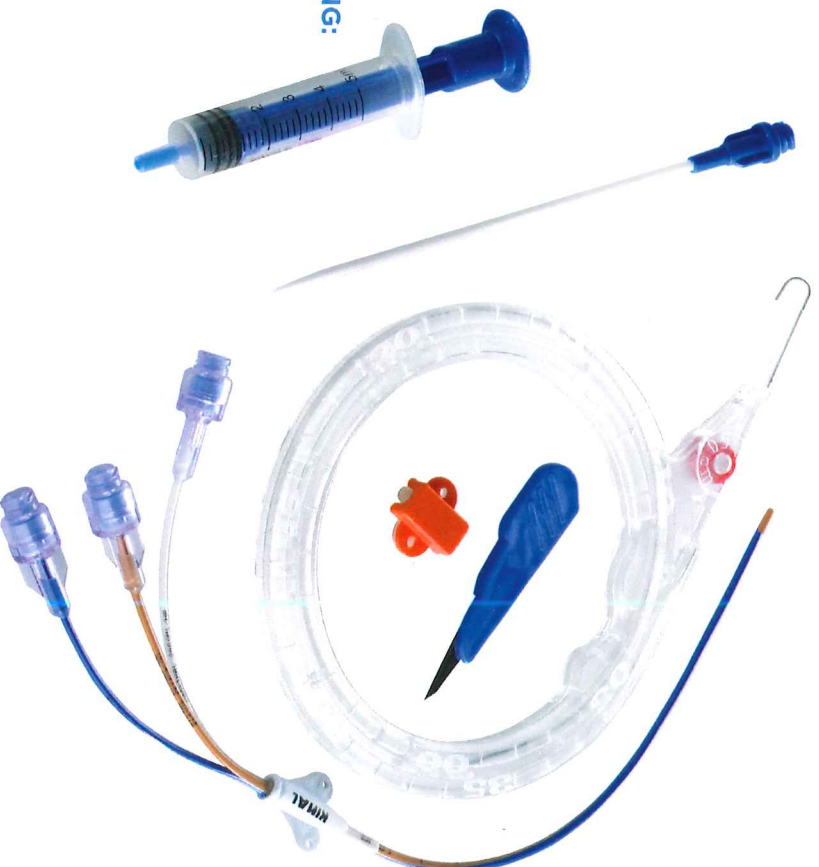

THE ALTIVS™ ADULT RANGE

ALTIVS™ ADULT CENTRAL VENOUS CATHETER SETS CONTAIN THE FOLLOWING:

K2CS sets include the catheter, an introducer needle, 5ml guidewire introducer syringe, Altivs™ guidewire introducer containing a nitinol guidewire, hydrophilic dilator, No.11 Scalpel on a short handle, catheter fixation accessory.

K2CV sets include the catheter, an introducer needle, 5ml luer slip syringe,

Altivs™ guidewire introducer containing a stainless steel guidewire, dilator, No.11 Scalpel on a short handle, catheter fixation accessory.
