functions

- A) Inspiration
- B) Expiration
- C) Separation wall
- D) Flexible prong adapter

Miniflow® is a patient interface for the CPAP mode of ventilators. Miniflow® can therefore be connected to the inspiration and expiration tubes and thus to the ventilator. The ventilator adjusts and controls the CPAP parameter and provides the necessary gas flow.

You can connect the Miniflow® to the inspiration and the expiration tube, if your ventilator needs an external pressure measurement, add the T-piece into this connection (REF 4010).

Advantages of the nCPAP Miniflow® Generator:

- Minimal dead space
- Separation of inspiration- and expiration-gases
- Compatible with Medijet® accessoires
- Reduction of work of breathing (1)
- Flexible prong adapter for best position
- Simple use

• nCPAP generator Miniflow®

- Always use the largest prong to avoid leakage!
- Switch between prong and mask after some hours!
- Insert the prong only halfway into the nose!

IMPORTANT:

Single use product for a single patient only!

Easy and simple CPAP

medin® created a basic nCPAP device and easy to use for nCPAP therapies.

We combined our existing well known easy blender (REF 1085_15) with a bubble valve (REF 2040).

With this Bubble valve you are able to adjust the nCPAP pressure between 0 and 9,5 mbar at 7 lpm. By using it in combination with our Miniflow® as a patient interface you will get all the benefit of fixation of the medin® product range!

Accessories:

- A) Bubbler (REF 2040)
- B) Blender (REF 1085_15)
- C) Miniflow (REF 4000)
- D) Wheelstand (REF 5001)
- E) Circuit (REF 206746 or REF 206748)
- F) Humidifier

Pole clamp (for Blender): REF 900MR170

Dual pole clamp (for Bubble column and humidifier): REF 20CL02
